Specialist Consultant

Areas of Expertise

- Management Consulting
- Executive Management
- Industry Best Practices
- Risk Management
- Cost Controls
- Project Management
- Project Control Systems
- Quality Assurance and Control
- Alternative Energy Technology
- Analysis & Design

Background

Ms. Michel is a Pegasus Global Holdings, Inc. Special Consultant with more than 30 years experience in the construction industry. She is a registered architect and owner's representative and has worked extensively on major public infrastructure projects and private developments. Ms. Michel has managed complex projects for city agencies and private developers throughout all phases of project management. Experiences include design and construction oversight of intermodal ferry terminals for the City of New York; streetscape and park improvements; and hi-end hi-rise apartment buildings for private developers. Project expertise includes integrated alternate energy technologies, such as photovoltaic panels, radiant flooring, and wind turbines.

Ms. Michel has considerable experience in spending transportation, capital and energy grant monies. In particular when overseeing design and construction of the NYC public and private ferry/intermodal transportation facilities, she expended federal and state funds from FTA and ISTEA (Intermodal Surface Transportation Efficiency Act); NYC funds from the NYC Office of Management and Budget and discretionary Borough President Funds ("Resolution A"); as well as alternate energy funds from NYSERDA (NY State Energy /Research Development Agency). As such Ms. Michel is familiar with funding opportunities and the many arduous (and sometimes convoluted) procurement and reporting requirements.

Education and Courses

Education

- Bachelor of Arts in Architecture, Washington University, St. Louis, Mo (1977)
- Masters of International Administration, School of International Training, Brattleboro, Vt. (1990)

Registrations
