## PROFESSIONAL EXPERIENCE

Mr. Clark has practical involvement in all aspects of capital project lifecycles, from development to execution and through operations, including assessing and reporting on performance, identifying areas for improvement, and planning and implementing recommendations. He is experienced in leading and managing cross-functional applications and offers an astute ability in planning and comprehending the larger strategy and dissecting the unique tasks needed to achieve that objective. He is skilled in successfully planning and completing assignments individually or as part of a larger team, in addition to working directly with different cultures and across language barriers.

Mr. Clark has served as project manager on a number of engagements where he has had responsibility for development and implementation of the engagement work plan, including working with the client to identify objectives and defining the scope to achieve those objectives, assigning specific scopes of work to project team members, preparing and reviewing work product prior to submittal to the client, and serving as the client interface throughout these engagements. Scopes of work Mr. Clark has performed generally include assessments of the client's project/program management functions and decision-making in executing large and complex projects. He has performed project prudence and performance audits, risk reviews and analysis, research and monitored projects, designed, reviewed and evaluated reports, and coordinated efforts of analysis teams.

Mr. Clark's experience encompasses a number of large and complex projects across the energy, utility, and infrastructure sectors, including the Darlington Nuclear Refurbishment Program; the Kemper County IGCC Project; the Edwardsport IGCC Project; PSE&G's Energy Strong Program; the California Courthouse Construction Program; the Alaskan Way Viaduct Replacement Project; the New NY Bridge Project; and, major interstate transmission projects.

Prior to joining Pegasus-Global, Mr. Clark has managed assorted businesses, including responsibilities with operations, sales, accounting, budgeting, and managing staff. In a managerial capacity, he continuously sought and identified methods to improve operational practices, boosting effectiveness and efficiency. He has led marketing efforts, including development of marketing material, proposals for new work, identification of potential new engagements, and providing direction to the website content and design.
